

# Application for Fish Passage Barrier Evaluation

The Family Forest Fish Passage Program is a cost-share program for small forest landowners to improve fish passage on their forestlands. If you think you may have a fish barrier and are interested in receiving either financial or technical assistance with replacing this barrier, please complete this application and either submit it along with your Forest Practices Application, your Checklist Road Maintenance and Abandonment Plan or send directly to the Small Forest Landowner Office (SFLO). A fish barrier is any artificial in-stream structure such as a culvert, dam or road crossing that impedes the free passage of fish. For a full explanation of this program, please refer to the Family Forest Fish Passage Program Guidelines that have either accompanied this application or are available from the (SFLO).

When the SFLO receives your application, a field representative will contact you to set up a date for a site visit to confirm you have a barrier. If it is determined you do not have a barrier, you will no longer be enrolled in the program. If it is determined that you do have a barrier, the barrier will be placed on a prioritized list and will be eligible for cost-share funding when it becomes a priority within your watershed and funding becomes available. You may also elect to fix the barrier at your own expense.

☐ I choose to enroll in the Family Forest Fish Passage Program and would like to have my potential barrier evaluated for eligibility. I understand that by submitting this application I am not obligated to accept state funding if I so choose.

☐ I choose not to enroll in the Family Forest Fish Passage Program and accept responsibility for removing or repairing any artificial fish barrier on my forest roads at my own expense.

**Please attach a MAP of the project location and DRIVING DIRECTIONS, which are needed to process this application. A field technician will contact you prior to making a site visit.**
